

- There are invisible regions along Mass Ave, walk randomly along the sidewalk (don't cross the street). Try to behave as independent particles, i.e. don't stall to chat with others
 - The red region indication on top should be between 0 and 5 or $(0,0) \sim (5, 0)$
- **ONLY Press** the buttons on top ("**Take Pic**", "**Region # Get**") as often as you can.
 - If you don't get a picture from "Region X Get", try another region.
 - After you press a button, don't move until you can press buttons again
 - Read the the pop-up messages, you do not need to read the scrolling messages
- It's normal for the apps to be nonresponsive or doesn't let you press buttons, but if it hangs more than 1 minute, walk over to us and let us know
- If you press a button, press the same button on both (yellow and blue). They don't have to be at the same time, but just the *same sequence* of presses

IMPORTANT

- Do not press the power button on the side and turn off the phone!
- If you see a popup that says "**xxx is not responding ...**"
 always respond with WAIT
 you would crash the app if you press the other option "okay" or "force close"
- If you see "System Update" press "Install later"
